

API GATE VALVE PARTS

Model F/FC

Manual

FracSync supplies high-quality OEM-style API 6A gate valve parts engineered for reliable performance in demanding oilfield applications. Our product offering includes gates, seats, stems, body bushings, bonnet seal rings, bearings, retainers, and complete repair kits for FC-style and slab gate valves ranging from 1-13/16" through 7-1/16" in pressure ratings from 2K to 15K PSI.

Designed for durability, interchangeability, and field performance, our components are available in standard and sour service configurations with material options including 410 stainless, tungsten carbide, and other high-performance trims.

FracSync focuses on dependable quality, responsive service, and fast turnaround to support drilling, frac, flowback, and production operations.

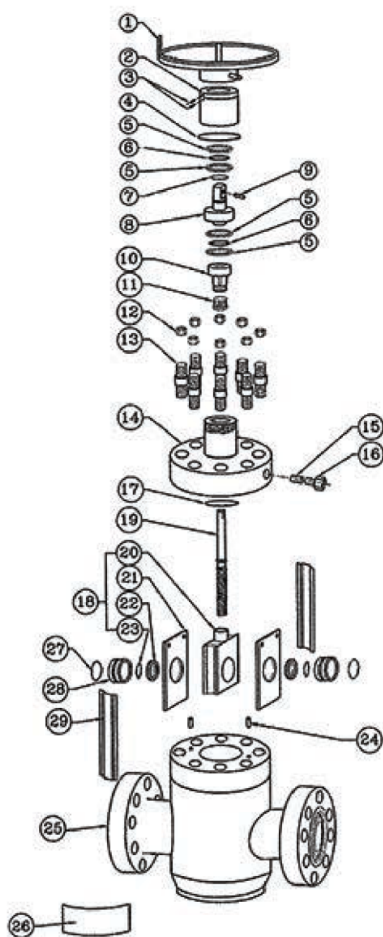

*NOTE - parts are not required, please call for more info.
